

Date night and you want to choose a movie

It's date night and my partner and I want to watch a romantic comedy. Aside from the specific genre, we have no idea what to watch! I want to log into my profile and ask for tailored rom-com recommendations based on my likes and online activity; I want the movie to be somewhat in line with my interests! I don't want a horror recommendation, since that won't set the mood. All we want is a rom-com.
